
This is a post about a totally amazing piece of software. It's the ONLY one of its kind and it does all kinds of stuff you'll love. And I'm not going to keep you waiting, either! There are two versions: Binksetmemory 8 Free and Binksetmemory 8 Professional. The free version lets you do some really cool things like draw, cut out shapes, write your name, use cool fonts and more. You can't save or print your work with this one though. If you want to save your work, print it, send it by fax or save it as a graphic file to use later you need the pro version. Plus there are some other powerful features that are only in the Professional version. Binksetmemory 8 was written by Blaine Binks, the brainchild of the SuperMath Software Company. They have been writing software since 1985 and have sold thousands of their programs all over the world. I've used their stuff for years and always rave about how good it is compared to similar software by companies like Broderbund or Sunburst Software. Blaine's programs are way ahead of them all in terms of design, originality and price. Binksetmemory 8 isn't expensive and because of its unique features, it could be a money maker for you. It makes a great gift, too. I've even sent Binksetmemories as gifts to all my family and friends and they all rave about it. We've licensed the Binksetmemory 8 software for Macs running Mac OS X 10.3 or later and Windows PCs running Windows XP or Windows Vista (32-bit). If you're using Mac OS X 10.4.6 or later, you'll get the most out of Binksetmemory 8 Professional because it has additional features found in Mac OS X 10.4.6 or later that aren't in Mac OS X 10.3 or earlier. Binksetmemory 8 might even make your computer easier to use, too! It's an all-around great program! But don't take my word for it. Get the demo version and see if you like it! The download is below and there's no shipping cost either. If you like Binksetmemory 8, just order it online. You'll get a registration key that lets you unlock the program and it's only \$39.95 for the Professional version! Blaine has created other versions of Binksetmemory for other operating systems so don't miss out on his other cool software, too. Check out Samurai Samurai for Mac or Windows or Gr8Pic for Mac or Windows or k8Cam, our fun webcam program for Macs running OS X 10.4.6 to 10.4.11 and Windows PCs running Windows XP Home Edition (32-bit) (or (64-bit)). Or come see what else he has to offer at <http://www>.
